

Club Together Update June 2013

After reviewing progress made so far the committee have discussed the priorities for the CTO to address over the next twelve months these include.

Coaching

We have done very well in recruiting so many new coaches, it is vital we now start to develop and support them, which will in turn enhance the training sessions. All coaches, if they wish to further their knowledge, will have a personal development plan created. This will help identify what they want to do and how the club can assist them.

Partnerships

As well as maintaining our existing partnerships we are keen to develop better working relationships with the various clubs that we form composite teams with. Hopefully we can work together to solve common problems, share resources etc.

We are also very keen to further our links with local High Schools.

All previous areas of action that have been put in place will continue to be monitored.
